DIGITAL NOVELTY LICENSE PLATE APPLICATION
Web Site

Making the move to *digital*.

Last year ACI began investigating a new process of producing license plates that has been adopted by an increasing number of states. Digital production of plates began its use in the United States in the 1990's as an addition to existing embossed plates. By 2000, increasing numbers of states were turning to digital production due to increased speed and flexibility.

What are the main differences between traditional license plate production versus digital? There are basically two main factors that separate the two technologies: The thin flat surface, and the unique method of production.

Flat, finished plates without embossing is the first obvious difference. However these flat plates do have a debossed rim for added strength and rigidity due to their thinner material.

The second difference is that the flat plates are digitally printed. There is no "painting" of these plates, the letter choice and color are programmed in to a computer and the resulting image is printed on the plate blank. This technology is similar to common ink jet printing in regards to what it can reproduce.

ACI is excited to be able to offer more possibilities and a wider range of product applications with the move to digital. Keep watching for announcements of expanded products and services related to its new digital license plate plant.

HOW TO ORDER:

Use the grid to write the letters or numbers for your plate below. Auto size plates have a maximum of 8(eight) characters on white and 7 (seven) on A-sheeted and motorcycle size plates can have a maximum of 5 (five). After writing in your choices, then choose from the letter colors available below and indicate your choice. You must only choose one letter color per plate.

Auto grid

Motorcycle grid

-----TOP LEGEND

-----BOTTOM LEGEND

Letter colors available:

☐ Black ☐ Dark Blue ☐ Burgundy ☐ Cyan Blue ☐ Magenta ☐ Purple
☐ Forest Green (on white digital plates only) ☐ Yellow (on white digital plates only)

Copper plates have choice of top or bottom legend
Or both

Copper Embossed Plates have separate letter colors available from the digital plates. They are as follows:

☐ Black ☐ Reflex Blue ☐ Halftone Blue ☐ Bright Red ☐ Stop Sign Red ☐ Warm Red

Some symbols are also available for plates, they are as follows:

* . - . 0

2008 License Plate Descriptions

DLP1045 - White Digital Plate	\$ 7.50
This is a standard novelty plate with a letter or number combination containing no more than 8 characters in one color only.	
DLP1045C - White Digital Plate w/custom image	\$10.00
This is a standard novelty plate with the addition of a customer provided image i.e., logo, mascot, etc. If you request ACI to custom design a plate for you, this would also include a one-time \$25.00 artwork charge.
